

# Problem Solving in Global Health

# The Situation

- Your family group takes the role of an aid team.
- You have been sent in to assess the situation and provide solutions to alleviate any health problems that arise.

# Problem Solving in Global Health

- **3 Workshops:**

- Session 1: **Defining and diagnosing the problem**

- *What you see is not all there is*

- Session 2: **Generating Solutions**

- *Prioritise the needs of the community*

- Session 3: **Refining Solutions**

- *Pre-mortem Analysis. If your solution doesn't work, what would be the most likely reasons?*

# Key Tips

- **Take a 20,000ft view** – *does your diagnosis explain all of the symptoms?*
- **Take notes** – *it's hard to put it together in your head*
- **Ask questions** – *knowing what to look for is at the heart of solving problems*
